parallel sessions. Generally the topics of presented papers on the second day was about economic, political, fiscal, historical, literary and other professional and technical issues. This conference is open to all academicians, practitioners, researchers, and students.

We attended the congress with the statement we prepared together with Gizem Akbulut. "The Effect Of 2008-2009 Global Economic Crisis On Kazakhstan Fiscal Policy: National Fund Implementation" was presented by Barış Yıldız. Barış Yıldız was the chair of our session. In the presentation, Kazakhstan was one of the first countries to implement the crisis prevention package against the 2008-2009 global crisis. In the presentation, it was said that Kazakhstan was one of the first countries to implement the crisis prevention package against the 2008-2009 global crisis and that perhaps the most important source of this package was the "National Fund" established in 2000. The aim of our study was to examine the fiscal policies and the effects of the national fund implemented in the 2008-2009 financial crisis of Kazakhstan. Kazakhstan has been striving to transfer resources to the country's economy through measures taken against crisis. For this purpose, it was first explained how Kazakhstan is affected from the crisis. It is explained how the national fund is used to fund resources for fiscal policies. Explanations are supported using numerical data. Kazakhstan Statistical Institute was used for this purpose. In this direction in Kazakhstan; It has been stated that "efforts have been made for regional employment, re-training of staff, trying to create new business areas for job loss, repairing and regulating motorways, meeting the needs of important social institutions such as schools and hospitals, orienting young Kazakstan to new areas and structuring the health system". Attention has been drawn to the weight of social expenditures in Kazakhstan's fiscal politics. It is noted that social expenditures are covered by expenditures made from the national fund. Using World Bank data, it is stated that Kazakhstan provides positive progress in areas such as poverty, economic growth and unemployment. The papers presented in "UMTEB-2017 1st International Congress On Vocational And Technical Sciences" will be printed for in the congress book in the after passing through the referee process.

The conference was held with the participation of a number of academics from different countries who are experts in the field. Thanks to this conference, evaluations were made with different perspectives both on the Turkish economy and on global economies. In addition, policy recommendations have been presented to address local and global problems. At the same time, it made contributions to science world, to communication network constituted among scholars and to studies which were made and to be made in various areas of finance discipline. Thanks to the conference, the work done by the participants was shared on the academic platform and further developed.
